

Good News from Life Church

The body of Christ serving the Community

Sheila shared a picture she received during worship during the service ...each snowflake is individual, with different designs and this is how God sees us. But as the flakes join together they create snow drifts and snow banks. When we come together we create Gods church, His family. God loves us individually but draws us close together.

'Just as our bodies have many parts and each...has a special function....We are many parts of the one body and we all belong to each other....God has given different gifts for doing certain things well.' Romans 2 v 4 – 6.

Art Worship Sunday

We are Creative beings because **God breathed His Creative spirit within us**. It's about discovering and releasing this spirit within ourselves and that is what many people did during this Art Worship meeting. It's also about **relationships** and having fellowship with each other – building up the church body. And it's about sharing with friends and neighbours and including them in our Family church service, doing Creativity and sharing the gospel with them. There were more than 90 people at this event and at least 15 of these were visitors. There was a real 'buzz' in the meeting with lots of encouraging comments....'It was lovely to see some parents/grandparents picking up the little Easter booklets and reading these with their children'. This is **outreach** in its simplest and most comfortable form. This can become as natural as breathing if we are prepared to do it regularly.

(MARCH) - After the cold, dark winter – Spring brings New Hope
